Read the article and choose the correct answer A, B, C or D.

Shakespeare's Globe Theatre is a popular topic for people interested in theater and history. However, the Global Theatre as we know it today is not the same building that was used originally. In fact, the Globe was situated in many different places during its history.

When the rental agreement on the original location ended, one of the actors bought a theater called Blackfriars, which was located in another part of town. However, many complaints from neighbors and the town council led to a petition that requested that the acting group move their company out of town. Upset with this news, the actors returned to the original theater, took most of it apart, and then moved the materials across the Thames River to Bankside, where they proceeded to construct the next version of the Globe.

This endeavor, though, did not go smoothly. The owner of the original Globe Theatre, who had rented it to the actors, took the acting group to court. He wanted the actors to pay for the damage they had done to his building. In the end, however, the actors won the case and continued to construct their "newly acquired" theater. Later, the actors split their plays between the original theater and the new Globe.

In 1612, the original Globe burned to the ground. How did this happen? Historians believed that a cannon that was shot during a performance of the play Henry VIII started a large fire. Yet, the Globe Theatre still survived. However, it was shut down by the Puritans in 1642 and later destroyed during the English Civil War of 1643.

In May of 1997, Queen Elizabeth II officially opened a newly constructed version of the Globe with a production of Henry V. This is the Globe Theatre that people visit today. The queen wanted the new theater to be much like the old one. The new model is very similar to the original theater. For instance, it is also a three-story building. Also, it has seating for 1,500 people. In its first season, the theater attracted 210, 000 people.

There are some important things to remember when visiting the Globe today. Since the theater was reconstructed to be very similar to the original theater, some customers may not find the seating or experience to be as comfortable as in a typical modern theater. For example, plays are not canceled due to bad weather. Therefore, if the day is extremely hot or if it is raining (remember, it is an outdoor theater), the play will continue as scheduled. Secondly, there are many stairs that theatergoers must climb to get to and from their seats, which can be very tiring for some. Finally, if you are watching the play from the "yard," you are not allowed to use an umbrella or even to sit down. Certainly, visiting the Globe today promises visitors an exciting experience, much like visiting this theater hundreds of years ago.

The word "acquired" in paragraph 3 could be best replaced by which of the following?

- ☐ A. Discovered
- ☐ B. Obtained
- ☐ C. Stolen
- ☐ D. Bought

Upset with this news, the actors returned to the original theater, took most of it apart, and then moved the materials across the Thames River to Bankside, where they proceeded to construct the next version of the Globe.

This endeavor, though, did not go smoothly. The owner of the original Globe Theatre, who had rented it to the actors, took the acting group to court. He wanted the actors to pay for the damage they had done to his building. In the end, however, the actors won the case and continued to construct their “newly acquired” theater. Later, the actors split their plays between the original theater and the new Globe.

In 1612, the original Globe burned to the ground. How did this happen? Historians believed that a cannon that was shot during a performance of the play Henry VIII started a large fire. Yet, the Globe Theatre still survived. However, it was shut down by the Puritans in 1642 and later destroyed during the English Civil War of 1643.

In May of 1997, Queen Elizabeth II officially opened a newly constructed version of the Globe with a production of Henry V. This is the Globe Theatre that people visit today. The queen wanted the new theater to be much like the old one. The new model is very similar to the original theater. For instance, it is also a three-story building. Also, it has seating for 1,500 people. In its first season, the theater attracted 210, 000 people.

There are some important things to remember when visiting the Globe today. Since the theater was reconstructed to be very similar to the original theater, some customers may not find the seating or experience to be as comfortable as in a typical modern theater. For example, plays are not canceled due to bad weather. Therefore, if the day is extremely hot or if it is raining (remember, it is an outdoor theater), the play will continue as scheduled. Secondly, there are many stairs that theatergoers must climb to get to and from their seats, which can be very tiring for some. Finally, if you are watching the play from the “yard,” you are not allowed to use an umbrella or even to sit down. Certainly, visiting the Globe today promises visitors an exciting experience, much like visiting this theater hundreds of years ago.

In which year was the original Globe damaged by fire?

☐ A. 1609

☐ B. 1997

☐ C. 1643

☐ D. 1612

Shakespeare's Globe Theatre is a popular topic for people interested in theater and history. However, the Global Theatre as we know it today is not the same building that was used originally. In fact, the Globe was situated in many different places during its history.

When the rental agreement on the original location ended, one of the actors bought a theater called Blackfriars, which was located in another part of town.

However, many complaints from neighbors and the town council led to a petition that requested that the acting group move their company out of town. Upset with this news, the actors returned to the original theater, took most of it apart, and then moved the materials across the Thames River to Bankside, where they proceeded to construct the next version of the Globe.

This endeavor, though, did not go smoothly. The owner of the original Globe Theatre, who had rented it to the actors, took the acting group to court. He wanted the actors to pay for the damage they had done to his building. In the end, however, the actors won the case and continued to construct their "newly acquired" theater.
